Vista[®] L2-ER

*Level up your clarity and color confidence with
Vista L2-ER Spectrophotometer.*

As simple as you want, as powerful as you need.

Vista L2-ER is a transmission spectrophotometer for color and haze/turbidity measurement, built for regulated industries such as pharmaceuticals, petrochemicals, biotech, food and chemical manufacturing. It has role-based access, audit trails, electronic signatures, and traceable data export support FDA 21 CFR Part 11 compliance.

Vista® L2-ER

Vista L2-ER records each color measurement along with key metadata—including the operator, instrument serial number, calibration/standardization information, and date and time—and stores the results as protected electronic records in EasyMatch Essentials L2-ER.

Explore all the additional features and benefits below.

A Locked, Reproducible Audit Trail

Vista L2-ER writes each result into a locked audit trail with an automatic date and time stamp, and can reproduce those records in human-readable and electronic form, whenever an inspector asks.

Pass/Fail Judgments, Views Your Way

Set up the data views each analyst wants to see, and let Vista L2-ER mark every reading pass or fail against your specifications as the measurement lands.

Controlled Access and Locked E-Signatures

Only authenticated users get in, and their role decides what they can do, while password management and locked electronic signatures bind each approval to a named person.

Olive Oil

Transparent Sheet Plastic

Colas/Syrups

Fruit Juices

PLASTIC

Every Reading Fully Traceable

Because the operator, instrument, calibration, and timestamp travel with every result, you can trace any number back to how and when it was produced, without pulling a separate log.

System Validation Documentation, Included

Vista L2-ER ships with a printable pdf Validation and Compliance Notebook built in; for IQ, OQ, and PQ documentation to support your FDA 21 CFR Part 11 validation from day one, backed by HunterLab's ISO/IEC 17025-accredited calibration.

Records That Reach Your Enterprise Systems

Records leave Vista L2-ER as PDF, CSV, or XLSX and move through its available ports into LIMS, SPC, and MES, so results reach your enterprise systems without anyone re-typing a number.

Update Locally, or Push Across the Network

Update Vista L2-ER by USB, online from the instrument, or remotely through EasyMatch Quality Central, which pushes update files over the network to every connected instrument.

Flexible Pathlength Measurement and Small Sample Volumes

Vista L2-ER gives absolute color with 10 mm to 50 mm cells and vials and, if needed, reports 5.25 inch or 1 inch pathlengths automatically, so you avoid costly, hard-to-clean specialty cells. It reads very small spectral differences on minimal sample volumes, which matters when biopharma samples are expensive.

Clear Liquid Detergent

CHEMICALS

Food Dyes

Sports Drinks

Palm Oil

Tea Drinks

FOOD

Functional Beverages

Citrus Juice

Self-Guided Out-of-Box Startup

Time-Saving and Easy to Use: Integrated setup wizard enables quick training and immediate operation, reducing on-boarding time and operator dependency.

Advanced Data Export and Communication

Seamless Connectivity: Features USB ports, HDMI, and peripheral support for easy data export, printing, reporting, and integration into existing workflows.

Connectivity with LIMS and SPC systems

Simplifies QC Workflows: Enables trend analysis and centralized data management across manufacturing sites for improved process control.

CONTACT US

We've worked with thousands of companies, but you'll feel like our one and only. If color accuracy is crucial to your business, you've come to the right place—with the right people. Let's get in touch. Ask a question, Request a quote or just say hello!
